For Sale

This DHC-3T is an immaculate piece of aviation history. Owned and operated by aviation pioneer Max Ward, this Garrett Turbine Otter was used to ferry family and friends around during Canadian summers. Maintained to the highest standard by the same maintenance technician for the past 15 years, trend monitoring has been recorded for every start up since 2007. Only two owners since manufacture and back to birth logbooks make for a complete history. No shortage of upgrades, STC's and extras including wheels, skis and floats. Now proudly listed for sale by Gravitas Aviation Ltd.
